drive to the future

DYNAComfort
EH228

PASSENGER CAR | HIGH PERFORMANCE

HIGH PERFORMANCE

EVERGREEN has produced HP tires designed to handle the extra power, reinforced brakes, and sport-tuned suspension of modern vehicles. The tires feature a lower aspect ratio for greater tread width, as well as a speed rating of H or higher for enhanced stability. Now you can relax and trust that these tires will give you the best performance and safety possible.

DYNAComfort EH228

The DynaComfort EH228 is an economical HP tire with a pattern design focusing on wet grip and rolling resistance performance. It offers superior cost-effectiveness and excellent overall performance.

**T/H/V/W Rated

55-70 Series**

Reinforced Structure

The inner pattern is reinforced by ribs to strengthen the rubber, providing a better grip on the road and allowing for better control when cornering or swerving.

asymmetric pattern design

The unique asymmetric pattern design increases tire rigidity and creates improved stability for steering and handling.

WET GRIP

EH228 provides a reliable grip on slippery surfaces and can handle different wet conditions with ease. It guarantees a secure grip on wet surfaces, providing you with total confidence and worry-free performance.

Drainage

The high-density groove design efficiently cuts through the water film, combined with the contour design of CATR technology, effectively drains water.

Silica-Rich Formula

This product is a unique high-wet slip performance formula that is specifically engineered for maximum wet performance.

COMFORT AND ECONOMY

The DynaComfort EH228 is designed for drivers who need a balance of comfort and economy. It offers a smooth ride, excellent cornering stability, and a longer tread life for added value.

Longer Tread Life

The edge chamfering design of the pattern block can effectively wrap the road surface and reduce irregular wear to extend wear life.

Fuel Efficient

Optimized product design, with high-performance rubber formula, smaller rolling resistance, extraordinary energy-saving physical examination, and outstanding cost performance.

Driving Comfort

Optimized pitch arrangement and pattern design effectively reduce noise and improve driving comfort.
