drive to the future

DYNACOMFORT
EA719

In all weather conditions

All-Season Safety

Evergreen all-season tires provide versatile performance in a variety of road conditions. With tread pattern and rubber compound that make them suitable for wet conditions and a wide range of hot and cold temperatures. No need to waste time changing tires when the season changes.

The DynaComfort EA719 is engineered with a directional tread pattern and all-season compound to deliver optimal handling, extended tire lifespan, precise cornering, and superior grip across diverse weather conditions.

Optimum Grip

The directional tread pattern is designed to handle wet and icy conditions. Its ability to efficiently evacuate water enables excellent traction and improved steering response.

All Season Driving

The EA719 is designed to offer year-round driving comfort and convenience. The new tread compound design is suitable for all-season climates, ensuring travel safety regardless of the weather outside.

Economic Driving

Improved driving safety and longer tread life are achieved through the inclusion of central longitudinal ribs and strengthened shoulders.

The latest tread compound offers greater wear resistance, resulting in extended mileage.

Excellent Braking

The tread tip pattern enhances traction and reduces braking distance for driving in all seasons, including snowy and icy conditions.

The 3PMSF marking ensures adherence to local regulations for optimal usage in both summer and winter seasons.
