## Features

Strengthened tread structure

Anti-wear material

Optimized pattern design

UHT steel cord

## Benefits

- ▶ Maximizes durability and retreadability.
- ▶ Gives the tire excellent anti-wear characteristic.
- ▶ Improves drainage and control performance.
- ▶ Provides higher strength and rigidity.

## Size

| Size        | PR | LI/SS | Type | Standard Rim | Overall Diameter (mm) | Section Width (mm) | Tread Depth (mm) | Load  |       | Pressure |        | Plant |
|-------------|----|-------|------|--------------|-----------------------|--------------------|------------------|-------|-------|----------|--------|-------|
|             |    |       |      |              |                       |                    |                  | S(kg) | D(kg) | S(kPa)   | D(kPa) |       |
